Engineered Delivery Products

www.bpmfg.com

AMERICA'S LEADING MANUFACTURER OF HIGH QUALITY DELIVERY PRODUCTS

COMPANY HISTORY

B & P Manufacturing has been engineering material handling products since 1945 where we began as Brooks & Perkins. Since then our products and processes have seen dramatic changes in order to keep in step with the changes of the industries that our products serve.

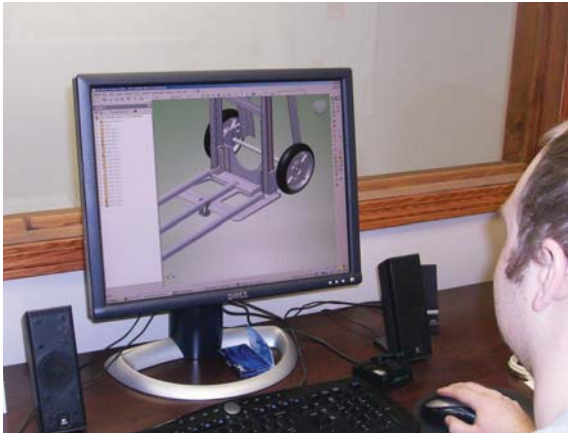

In 1996 we completely re-engineered our product lines, replacing old designs with newer, lighter weight and more durable designs.

Over the past 5 years we have made major investments in state of the art equipment and engineering personnel all with one goal in mind, to offer our customers the best built best backed products in the industry.

By utilizing cutting edge technologies, such as our solid modeling software, we can go from concepts to full production in record time. This also allows us to respond rapidly to changes based on customer needs, and respond to new opportunities as the markets evolve.

We continue to invest in the latest equipment. This reduces our dependency on outside suppliers, and increases our production capacity while maintaining the highest level of quality in the industry.

Our inventory levels of both raw materials and completed goods are expertly maintained. Whether you need one handle or 5,000 hand trucks, we respond quickly to customer needs.

CREDIT TERMS

1. **PAYMENT:** Net 30 Days
2. **FOB:** Factory or manufacturing location
3. **CREDIT APPROVAL:** Seller reserves the right at any time to revoke any credit extended to Buyer as a result of Buyer's failure to pay for merchandise when due or for any other reason deemed good and sufficient by the Seller and in such event to require payment prior to shipment.

ORDER HANDLING

1. **ACCEPTANCE & APPROVAL:** Buyer's orders submitted shall become binding and effective only upon acceptance & approval by the Seller at its office in Cadillac, Michigan
2. **BUYER'S CONFIRMATION OF TELEPHONE ORDERS:** Buyer must confirm all telephone orders in writing to the Seller's representative with whom the verbal order was placed. If the written order is not marked "confirming" and duplicate shipment results, freight, restocking and other charges are the responsibility of the Buyer.
3. **ACKNOWLEDGMENTS:** When required, Seller will mail written acknowledgments to the Buyer for all Buyer's accepted and approved orders.
4. **ADDITIONS TO PURCHASE ORDERS:** Additions to purchase orders that have already been processed by the Seller will create delays in production of the items ordered. It is to the Buyer's benefit to enter a separate purchase order for these items. Every effort will be made to see that these orders ship on a common bill of lading with the original order when requested by Buyer; however, Seller accepts no responsibility for freight charges in the event this request cannot be met.

PRICING POLICIES

1. **TAXES:** Prices do not include federal, state or local taxes.
2. **PRICE CHANGES:** B&P reserves the right to make any price changes as needed.

CONDITIONS OF SALE

1. **LOSS OR DAMAGE IN TRANSIT:** Seller inspects and makes delivery to the carrier at the shipping point in good condition. Carrier acts as Buyer's agent. Seller shall not be liable for non-arrival made under this contract which may be lost in transit; nor for losses, damages or delays in transportation. Loss or damage should be noted on the delivery receipt and claims should be made directly to the transportation company immediately.
2. **ROUTING:** Shipments will be routed "BEST WAY" transportation charge COLLECT unless otherwise requested. Every effort will be made to comply with desired routing. "Prepaid" freight cost will be invoiced directly to the Buyer.
3. **PRODUCT SPECIFICATIONS:** We reserve the right to make any changes in product specifications and designs without liability. Weights are approximate and for informational purposes only. Seller assumes no further liability, expressed or implied.
4. **CANCELLATIONS:** Orders, once acknowledged by Seller, can be cancelled only with Seller's consent and upon terms and conditions that will indemnify seller against losses.
5. **RETURNED GOODS AUTHORIZATION (RGA):**
 - a. Before returning any merchandise for any reason whatsoever, it is necessary to contact us for approval. If approval is given, an RGA number will be given by us to the dealer. This RGA number must appear on all documents involving the returned goods. Under no circumstances will returned goods be accepted at our dock without an RGA number shown on the shipping papers.
 - b. A written confirmation of each RGA will be mailed by B&P to distributor.
 - c. Freight charges on all RGA's must be prepaid.
 - d. RGA numbers will not be issued after thirty (30) days from date of shipment by B&P Manufacturing except on warranty claims. Issued RGA's will expire in thirty (30) days if returned goods have not been received by B&P Manufacturing or its designated representative. Applicable goods will not be accepted thereafter.
 - e. A minimum restocking charge of 20% will be made on all merchandise except as allowed under warranty claims.
 - f. Additional charges will be determined solely by B&P Manufacturing if the product is in a non-resalable condition.

g. Returns will not be allowed on any "Special" items determined solely obsolete products and products in non re-salable condition.

6. FIELD REPAIR AUTHORIZATION (FRA):

Before repairing any product on which a claim will be made, it is necessary to contact us for approval. Approval occurs only when FRA number is given. A written confirmation of the FRA will be mailed to you confirming the item involved, nature of repair and approved expenditure payment. Under no circumstance should you repair an item without prior FRA.

7. DELAYS IN SHIPMENT: Seller will make every effort to make shipments in accordance with the acknowledged scheduled shipping date, but Seller assumes no responsibility for any loss or inconvenience caused by non-shipment at a specified time. Cancellation requests due to delays in shipment shall be handled in accordance with Section 4 titled "Cancellations", unless Buyer and Seller mutually agree on a "No Later Than" date and order is acknowledged to that effect.

8. OSHA: Seller certifies that all terms furnished comply with Seller's interpretation of the Occupational Safety and Health Act of 1970 standards and regulations at time of shipment. Seller shall not be responsible for fines and penalties under this act or for losses sustained by improper use of any item. This is the sole certification and supercedes any, and all prior expressed or implied certifications.

9. FREIGHT COST QUOTED BY B&P MANUFACTURING:

Upon dealer request, B&P Manufacturing will obtain a freight quotation for shipment FOB, Cadillac, Michigan or point of manufacture. This service is advisory only. Responsibility for correct freight costs rests with dealer.

10. WARRANTY: The seller warrants to the original Purchaser that the items covered by this agreement shall be free from defects in material and workmanship under the normal use and service for a period of one year from the date of shipment to the seller. If within such a period any such product is proved to be so defective, such product shall be repaired or replaced at Seller's option. Seller's obligation is limited to such repair and replacement and is conditioned upon Seller's receiving written notice of any alleged defects within the warranty period and no more than (10) days after its discovery. After written approval by the Seller, the product or defective part must be returned to the seller, FOB, its factory. The term "Original Purchase" as used in this warranty shall mean the person or entity to whom such product was shipped by Seller or it's distributor or Seller's agent.

This warranty shall not apply to products or parts repaired or altered by other than the Seller or subject negligence, accident, abuse, misuse or damage.

This warranty does not apply to parts subject to wear.

With respect to parts not manufactured by Seller, the warranty obligations of the Seller shall in all respects conform and be limited to the warranty actually extended to seller by the supplier.

THE FORGOING WARRANTY IS EXCLUSIVE AND EXPRESSLY IN LIEU OF ALL OTHER EXPRESS AND IMPLIED WARRANTIES WHATSOEVER. INCLUDING BUT NOT LIMITED TO IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. SELLER SHALL NOT BE SUBJECT TO ANY OTHER OBLIGATION OR LIABILITIES WHATSOEVER WITH RESPECT TO ITS PRODUCTS OR SERVICES OR ANY UNDERTAKINGS, ACTS OR OMISSIONS RELATING THERETO. SELLER NEITHER ASSUMES NOR AUTHORIZES ANY PERSON TO ASSUME FOR IT ANY LIABILITY IN CONNECTION WITH THE SALE OF THIS PRODUCT OTHER THAN AS EXPRESSLY PROVIDED HEREIN.

2 Year Warranty

Warranty covers failure of genuine B&P Manufacturing Liberator products due to defective material and/or workmanship. The 2 year warranty covers the following components: dockboards and plates, hand truck frames, frame components, handles, noseplates, noseplate brackets, axles, axle brackets, stairclimbers, stairclimber components, frame extensions, bulk delivery carts, walk ramps, and any other genuine B&P Manufacturing Liberator parts.

Liberator parts that are not covered under the 2 year warranty are: tires, inner tubes, wheels, bearings, casters, lift chains and parts other than genuine B&P Manufacturing Liberator parts. These items carry the standard warranty stated on page 4.

E Accessories

Hand Truck Accessory Bag

Part #8218-001

Size: 12" w x 18" h x 2" d

Part #8218-002

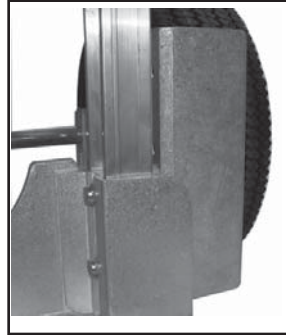

Size: 12" w x 18" h x 3" d

Wheel Guards

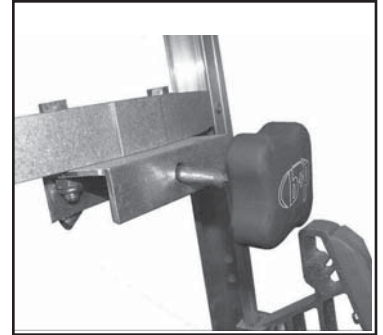

Part #E8 - 7.38"

Part #E8L - 12"

Keg Hook

Part #E9

Extruded Aluminum Stairclimbers

Part #E1L

Revolutionary, high-strength extruded aluminum stairclimber with a 1/2" thick heavy-duty wear strip, 15" long.

Kit includes 2 stairclimbers plus hardware. **2 Year Warranty**

Cast Aluminum Stairclimber

Part #E1C

Fits Liberator and S-Series Trucks.

Also fits most competitors trucks.

Kit includes 2 stairclimbers plus hardware. **1 Year Warranty**

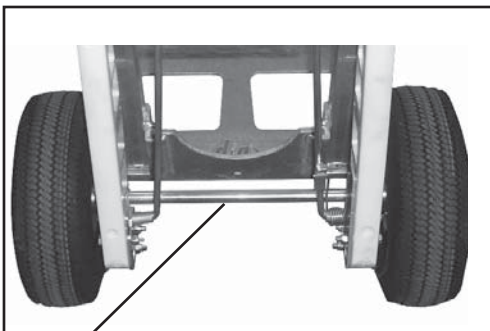

Steel Stairclimbers

(10" wheel only)

Part #E28

Steel stairclimber attaches a full 28" up the frame.

Lightweight, durable construction designed for the package delivery professional. **2 Year Warranty**

5/8" Steel Kick Bar For E1L Stairclimber

For use with 10" wheels Part #E46

For use with 8" wheels Part #E26

Pull Bar for E1L Stairclimber

Part #E29

Stretch Wrap Cutter

Part #SWC-1

20 per bag

Frame Extension Foam Sleeve Part # 2002-E11

Durable Material Cover
Resists Tears
Longer Lasting Than Plain Foam
Alternatives
Slides on Easily with a Spray of
WD40 or Silicone Spray

Ergo Grip - Black Part # 8017-003

Stronger and More Durable Than
Other Vinyl Grips
More Resistant to Tearing Through
Made From Thicker Vinyl

Hand Truck Frame Wings

Provides additional support for large boxes
and bags. Easy, bolt on assembly.
Adds 4" to hand truck width

Choose one of these popular models or build your own from components on page 13

"Senior"

Model A13-B81-C6-D5

- Loop Handle with Comfort Sleeve
- Heavy-Duty Frame with 5 Crossmembers
- 18" x 9" Solid Extruded Aluminum Nose Plate
- High Quality 10" x 3.5" 4 Ply Pneumatic Tires with Precision Bearings
- Crossbar with Comfort Sleeve

"Junior"

Model B70-C6-D5

- Double Grip Swing Arm
- Heavy-Duty Frame with 4 Crossmembers
- 18" x 9" Solid Extruded Aluminum Nose Plate
- High Quality 10" x 3.5" 4 Ply Pneumatic Tires with Precision Bearings

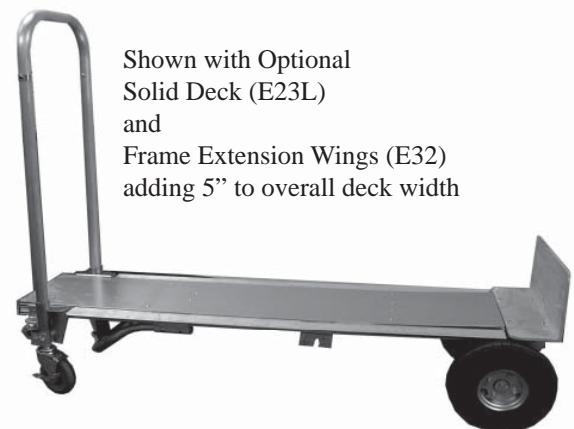

Guaranteed to be the best convertible you've ever used or send it back

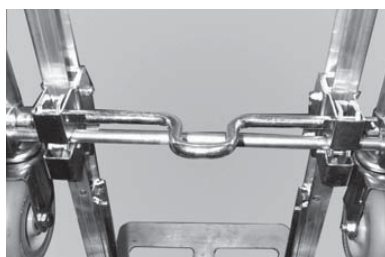

Liberator Convertible Features:

- Thicker and stronger frame with heavy duty side channel reinforcements.
- Crossbars are four-sided tube with two sides ribbed for added strength.
- Crossbars are attached with individual aircraft-grade rivets at each corner providing better frame integrity.
- Heavy duty high tensile steel axle will not bow under maximum loads.
- Balloon cushion caster wheels provide better rollability (wing brake standard on one wheel).
- Our components can be used to upgrade other leading brands of hand trucks.

Two year warranty!!

Shown with Optional Solid Deck (E23L) and Frame Extension Wings (E32) adding 5" to overall deck width

- One piece solid release bar
- Simple design with minimal moving parts for maximum reliability
- Smoothest release action in the industry

APRON HAND TRUCK DOCKBOARDS

- A lightweight solution for dock to truck/truck to truck applications
- Features our exclusive punched design providing excellent traction while preventing buildup of mud, slush, ice or debris
- Curbs provide an increased margin of safety
- Steel bolt-on legs

Model #	Size W x L	Capacity	Leg Length	Max Height Diff	Weight
AHTD-3036	30" x 36"	800 lbs	7"	5"	27 lbs
AHTD-3048	30" x 48"	800 lbs	9"	7"	35 lbs

- 4th wheel attachment takes the load off the operator
- Latch keeps the 4th wheel up and out of the way when not in use
- Lightweight design weighs only 8 lbs!
- 600 lb capacity
- Attaches to Liberator and S-Series Trucks
- Optional latch system locks the 4th wheel to prevent accidental closing (2002-E37L)
- Smooth rolling TPR casters

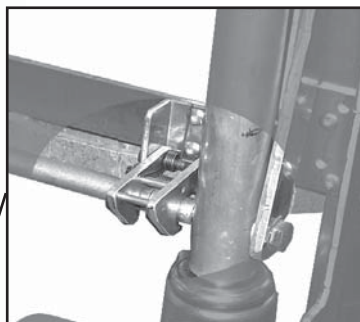

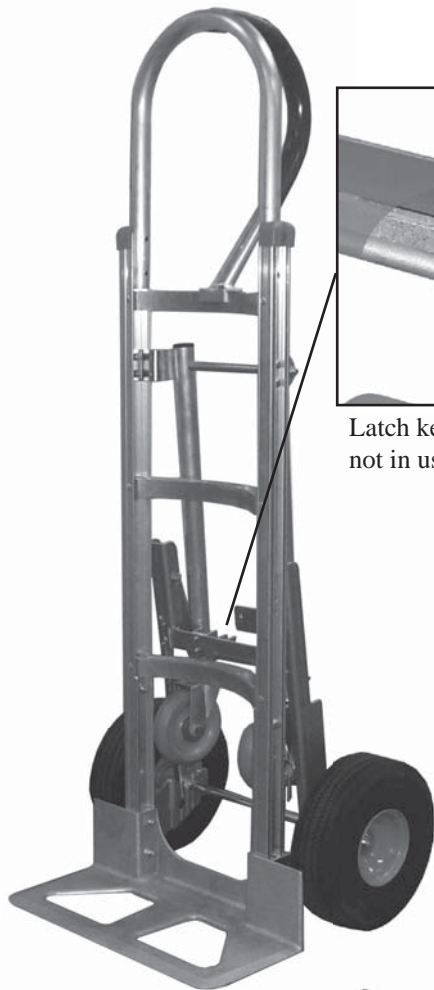

(Not compatible with stair climbers or convertible trucks.)

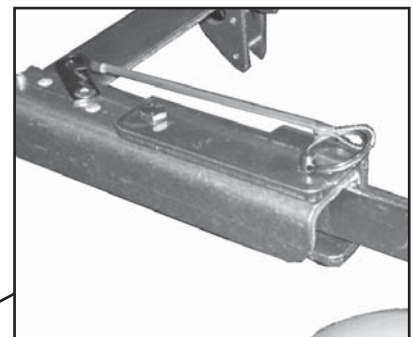

Optional cylinder attachment carries large tanks. (2002-E43)

Optional wings provide additional support for large boxes.(2002-E30)

Latch keeps 4th wheel up when not in use.

Latch and pin system keeps the 4th wheel extended (2002-E37L)

— “Three Way” Liberator Hand Truck — 19

Engineered for Bottled Water, Ice and Other Delivery Professionals

Truck Locks Securely in Any of the Three Positions for Safety

- Standard with 18" x 7.5" cast noseplate and 10" pneumatic tires with precision bearings
- Integral 27" folding nose for large loads stores out of the way when not in use

Other noseplates and wheels available

Totally New Curb Ramp Design Makes All Other Curb Ramps OBSOLETE!

Part #	Capacity	W" x L"	Weight
CRP2618	750 lb	26 x 18	8 lb
CRP2727	750 lb	27 x 27	13 lb
CRP2736	750 lb	27 x 36	17.5 lb
CRP3030	750 lb	30 x 30	15 lb
CRP2745	500 lb	27 x 45	22 lb

- Our exclusive process punches holes in the material, then raises the edges of the cutouts for superior traction
- Exceptionally lightweight
- Won't collect ice, mud, snow, or debris
- Handle slot doubles as a stop

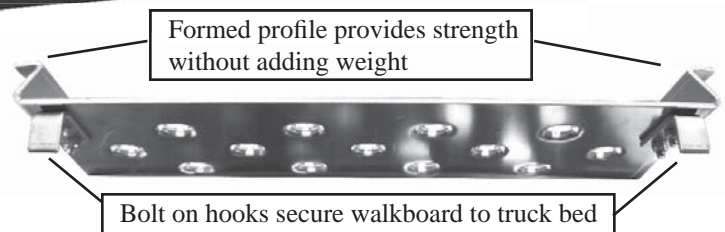

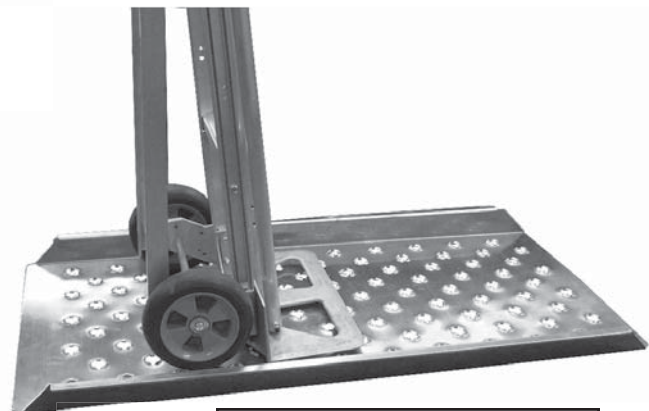

- Wedge design curb ramp features the same punched design for traction
- Sides folded down keep the ramp in place and allows more usable width
- 600 lb. capacity in a curb ramp weighing only 6 lb (22x24)

Part #	Capacity	W" x L"	Weight
CRW2224	600 lb	22 x 24	6 lb
CRW2724	750 lb	27 x 24	12 lb

WALKBOARDS

- Lightweight, one piece design is resistant to bending and fatigue
- Ideal for spanning between truck and loading dock
- Punched design won't collect ice, mud, snow, or debris

Part #	Capacity	W" x L"	Weight
LWB2448	750 lb	24 x 48	39 lb

Heavy Duty Food Service Trucks

- Automotive style, dual disc brakes provide the ultimate in driver control and safety
- Total stopping power for the heaviest loads
- Braking is not affected by rain, snow, mud, or slush
- New cable actuated design is virtually maintenance free and provides equal stopping power to both wheels for consistent braking action with no pulling left or right
- Available with pneumatic tires, foam tires, and our slime treated pneumatic tires for the ultimate in flat-free performance

Available in most handle styles

Order trucks complete, or kits are available to install on Liberator hand trucks.

Reduce risk of fatigue and injury!

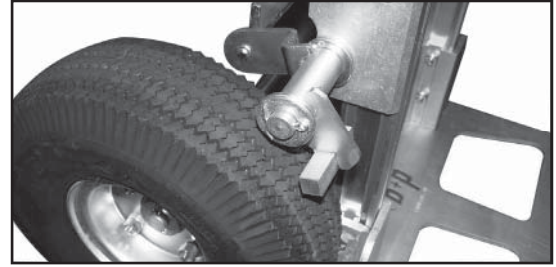

- 600 lb. capacity (with specified wheels)
- 4 sided frame crossmembers for rigidity
- Attached with 700 pound rated aircraft rivets
- Exclusive logo channel - Provides identity and unsurpassed fatigue resistance
- Non cracking, high strength extruded aluminum noseplates
- High tensile steel axle - standard
- Extruded axle brackets for strength and impact resistance
- Extruded - not cast - stairclimbers

BACKED BY A TWO YEAR WARRANTY!

"We have sold and serviced brake trucks for years and find that B&P works the best and requires virtually no maintenance"

-Southern Distributor

Brake shoes contact the front of the wheel, not the top or back. This prevents the possibility of locking up due to low tire pressure. Angled raking surface provides more friction on the tire than paddle designs, increasing stopping power.

Our unique lightweight tread brake design applies even pressure to both wheels assuring load control even in wet conditions. New cable design eliminates T rods and provides excellent leverage in an ergonomically correct design. Modular design allows for easy repair of damaged components.

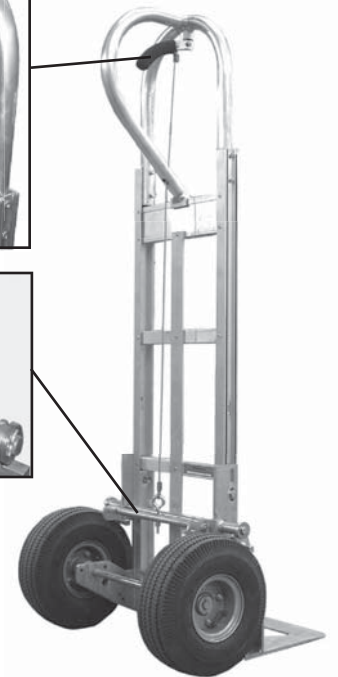

A1-B1-C8-D5-BTC

A5-B1-C8-D5-BTC

A8-B1-C8-D5-BTC

We Have Taken Our Proven Tread Brake System and **Made it Better!**

- We have engineered a lever and cable system for the handles which provides more leverage than previous systems and offers a more ergonomically correct design.
- The lower pull bar has been upgraded to eliminate the clevis. The eye bolt goes directly through the pull bar, allowing more adjustment than before.
- Previous tread brake systems are easily upgraded.

- Pre-load by account at the warehouse - carry only what you need, reducing fuel costs
- Eliminate picking on the street - Keeps product out of the elements and reduces the risk of injuries associated with bay trucks
- Average 40 cases per cart vs 10 for a hand truck - Reduce the number of trips by up to 400%
- Straight trucks instead of bay trucks - lower initial cost and lower maintenance costs
- Faster check-in time - Reduce account service times by up to 50% increasing customer satisfaction

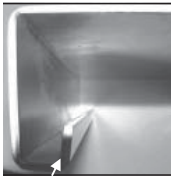

TWO YEAR WARRANTY

- Increase Efficiency
- Reduce Risk of Injuries
- Lower Maintenance Costs
- Better Driver Retention

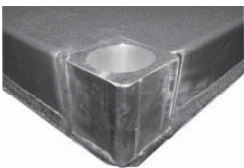

INCREASED BOTTOM LINE!

THE BEST BUILT, BEST BACKED CART!

- Heavy duty deck with double bracing is a full 1/8" thick
- Formed, one piece deck won't curl like welded deck designs
- Monolithic design virtually eliminates deck twisting and failure due to fatigue

- Fully welded handle pockets - Stronger and longer lasting
- Handles are round, heavy wall aluminum for excellent resistance to bending and breaking
- Handles stay in place while in use, yet easily removable for loading/unloading

EXCLUSIVE CENTER BRAKE SYSTEM

- Brake system locks both center wheels for loading/unloading and transportation
- Actuated from either end or either side
- No unexpected cart movement

*Free Freight Program does not apply to Bulk Delivery Carts.

Optional Removable Shelf (200 lb. capacity)

FHE-1

- 18" x 60" deck
- Two handles with 2 crossbars, 1 vertical strap, and buttons for containment curtain (part # each handle 2025-134)
- 8" x 2" Urethane center wheels (part #8057-114)
- 6" x 2" TPR square tread swivel casters (part #8057-038)
- 1200 lbs capacity
- Weight 90 lbs

Popular sizes in bold print available for "Quick Ship" upon request

Accessories

Handles

Add lift handles for easy movement
(Only available on 5,000 and 7,000 capacity boards)

Lifting Chains

Heavy duty chains for forklift moving of dockboards

Quickly and easily attached onto the dockboard curb with heavy duty steel hooks

(Recommended for boards 10,000 lb capacity and up)

How to choose a Dockboard:

Step 1: Determine capacity - add the weight of the forklift and the weight of the maximum load to be carried

Step 2: Determine Width - The width of the dockboard should be at least 18 inches wider than your widest equipment passing over the board. Remember, safety curbs take up 6 inches of usable width.

Example: A 60 inch dockboard has 54 inches of usable space.

Step 3: Determine Length - You need to know the maximum difference between the height of the dock and the height of the highest truck bed.

1. Max. Truck Height

2. Minus Dock Height

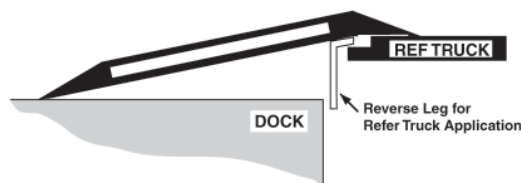

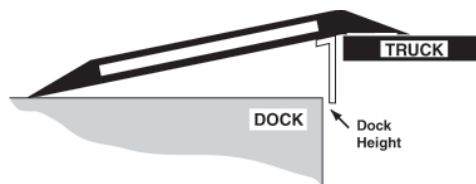

-

3. Equals Height Difference

=

Using the chart below, determine the length of the board you need. An 11 degree bend is standard. Example: If the maximum height difference is 7 inches, a board at least 48 inches long is required.

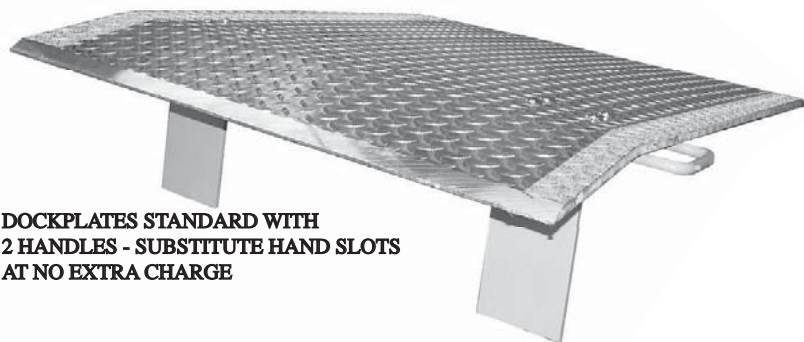

SLOPE ANGLE	MAXIMUM HEIGHT DIFFERENCE (INCHES)																	
	1	2	3	4	5	5.5	6	7	8	8.5	9	10	11	12	13	14	15	16
11 DEG. STANDARD				30	36		42	48		54		60	66	72	78	84	90	96

To Order Replacement Legs:

BOARD LENGTH	LEG LENGTH	TO ORDER 1 LEG (NO HARDWARE)	TO ORDER A PAIR OF LEGS (INCLUDES HARDWARE)
36 inches	7 inch	P/N 8062-001	P/N 3500-L7
48 inches	9 inch	P/N 8062-002	P/N 3500-L9
60 inches	12 inch	P/N 8062-003	P/N 3500-L12
72 inches	18 inch	P/N 8062-004	P/N 3500-L18

Best Selling Dockplates in America

DOCKPLATES STANDARD WITH
2 HANDLES - SUBSTITUTE HAND SLOTS
AT NO EXTRA CHARGE

- **High-Traction, Safety Treadplate Surface** gives positive traction for equipment and safe footing for personnel.
- **Bolt-On Legs/Handles** allow for quick field repair and ease of moving/lifting - Easily reversed for refrigerated trucks.
- **Beveled Edges** provide smooth entry and exit.
- **Engineered Bend** keeps the edges of the dock plate flush with both dock and truck.
- **Safety Yellow Tape** on edges for low light visibility

Two Year Warranty

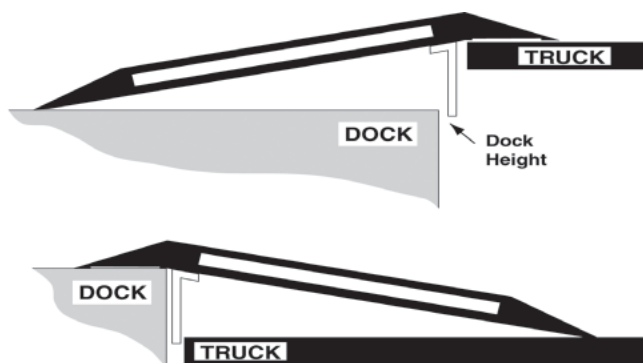

How To Select The Correct Dockplate: NON MOTORIZED USE ONLY!

Step 1: Determine Width - add 12" to the widest load that will go over the plate

Step 2: Determine Capacity - weight of pallet jack + maximum weight of items carried + operator weight

If the maximum load is within 50 pounds of the stated capacity, select the next highest capacity.

Step 3: Determine Length - required length is determined by height difference between dock and truck floor

MAXIMUM HEIGHT DIFFERENCE IN INCHES																		
SLOPE ANGLE	1	2	3	4	5	5.5	6	7	8	8.5	9	10	11	12	13	14	15	16
11 DEG. STANDARD				30	36		42	48		54		60	66	72	79	84	90	96

A Note About Capacities

All B&P dockplates are rated at actual capacities, per Aluminum Industry Association standards. Some other companies rate capacities with a formula that considers the fact that only two wheels of the four wheel vehicle will be on the plate at one time. This can artificially overstate the capacities of the plates, creating a potentially dangerous situation. We state our capacities as actual, giving you an extra margin of safety.

Dockplates are standard with 2 handles - Order with hand slots at no additional charge

AVAILABLE IN FORMED DECK OR WELDED DECK DESIGN***BOTH FEATURING A TWO YEAR WARRANTY!*****EXCLUSIVE FORMED DECK DESIGN**

- Strong and lightweight
- Design eliminates warping and waving
- High capacity
- Tread plate or smooth plate deck
- Handle and caster options for most applications

PTF-3048S-150-850
 30" x 48" smooth plate deck
 one standard #150 handle
 8"x2" TPR casters
 (2 swivel, 2 rigid)
 2,000 lb capacity

PTF-3048T-150-850
 30" x 48" tread plate deck
 one standard #150 handle
 8"x2" TPR casters
 (2 swivel, 2 rigid)
 2,000 lb capacity

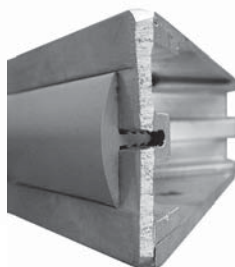

HEAVY DUTY WELDED DECK DESIGN

Industry exclusive side rails actually lock the deck in to provide strength and resistance to twisting and deck curling. The side rail also allows field installation of the protective bumper and deck carpeting. These features, combined with our standard setting heavy duty understructure, make this the best platform truck on the market, hands down.

PT-3060T-150-650
 30" x 60" tread plate deck
 one standard #150 handle
 6"x2" TPR casters
 (2 swivel, 2 rigid)
 1,500 lb capacity
 (2,000 lb capacity with
 #850 casters)

Available with Tread Plate,
 Smooth Plate, or Carpeted Decks

Full protective bumper available on all welded models in standard black or non-marking gray.

Shown with Full Protective Bumper
 and Carpeted Deck

PT-3060S-150-850-C-310
 30" x 60" smooth plate deck
 one standard #150 handle
 8"x2" TPR casters
 (2 swivel, 2 rigid)
 carpeted deck
 full perimeter gray bumper
 2,000 lb capacity

To suit your needs better, two types of ramps are available:

**OPTIONAL UNDER TRUCK CARRIERS**

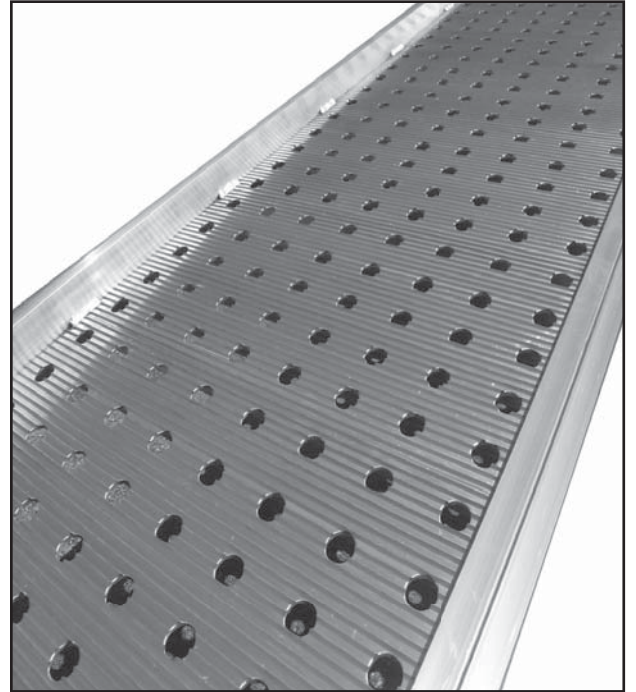

Available for Type F Hook End ONLY

C designates carrier, then width, length and open or closed.

Ramp Width	Ramp Length	Open Carrier P/N	Closed Carrier P/N
26"	14'	C2614O	C2614C
26"	16'	C2616O	C2614C

Other sizes available on a special order basis and will be non-returnable. Consult factory for pricing.

NEW PUNCHED DESIGN

- Holes are punched in the material, provides superior traction
- Won't collect ice, mud, snow, or debris
- Punched design reduces the weight without sacrificing strength
- Custom widths available
- Steel hooks lock onto truck bed for flush-type direct entry

Speeds Loading/Unloading and Material Movement in Warehouse or at Production Lines

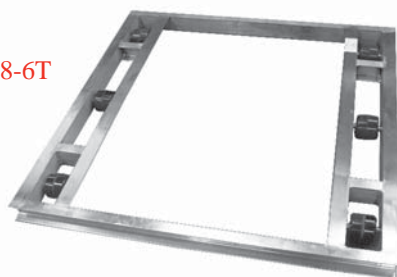

Model #4248-6T

Optional Handle

Model #2424-6T

Model #4848-6T

Light - Average weight only 40 lbs. Make possible return of number of dollies to leading point manually.

Rugged - Strong extruded aluminum frame and steel axles.

Maneuverable - Tilt Construction with 360 degree turning. Non-tilt also available.

Rollers - 3.5" rollers with sealed bearings.

All Popular Sizes - From 36"x36" to 48"x48".

Capacities - 4,000 to 8,000 pounds.

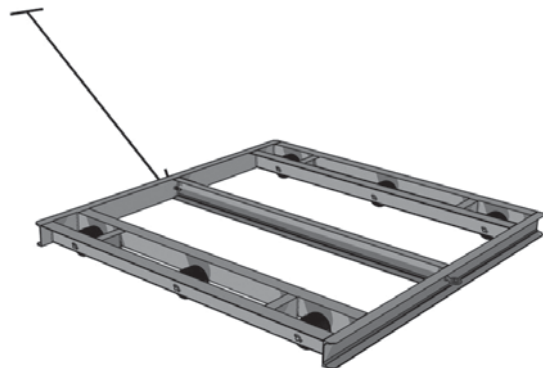

Economic Benefits - Frees fork lift trucks from short hauls. Greater worker safety and reduced labor time.

Size W x L Length is Travel Direction	4,000 Lb Capacity 6 Roller		6,000 Lb Capacity 8 Roller		8,000 Lb Capacity 10 Roller

24" x 24"	2424-6T	34				

Deck option available - consult factory

Non Tilt Type

If a non-tilt type of Pallet Dolly is desired, delete the "T" and add "NT" to the model number when ordering - No extra charge for the non-tilt type dollies

Two handle loops and one handle are available as optional equipment - push or pull either end
Add -H to model #
Example: 4848-6T-H

To order center support crossbar as an option
Add -CB to model #
Example: 3636-6T-CB

Tilt Type Dollies ROLLER CONFIGURATION

4000 lb. cap. — 6 Roller

6000 lb. cap. — 8 Roller

8000 lb. cap. — 10 Roller

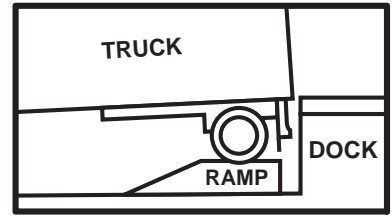

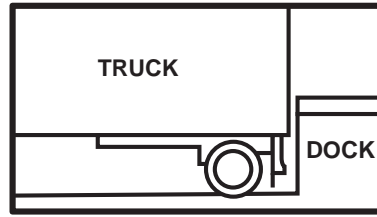

To Select Your Ramp:

Ramp selection is based on the following three items:

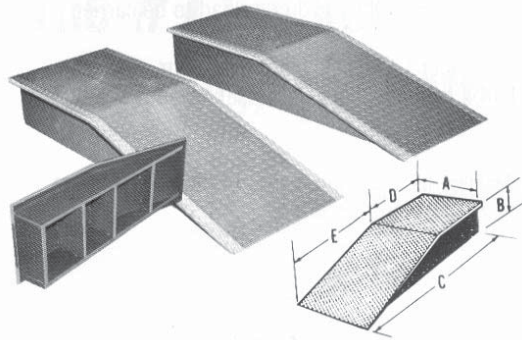

A Width - Based on the maximum wheel width of your largest vehicle.
For double wheel vehicles, choose the 24" width and use the ramp at the inside wheel location.

B Height - Determined by the following formula:
Dock Height + 2" = _____
minus Truck Bed Height = _____
Choose the next highest standard height in chart.

C Length - The longer the ramp, the less incline angle. Choose a length with an incline angle that your loaded vehicles can negotiate easily.

PILFERAGE**
Kit

MODEL APK-10

Kit includes: One 10 foot steel chain and attaching bracket

We were one of the first companies in the industry to utilize light metal robotic welding.

This advanced technology provides high volume welding with an accuracy and consistency that was not attainable before.

Streamlined processes and work flows allows large orders to be processed quickly. Average turnaround time for a stocking order is 5-7 business days - regardless of size. Think about that the next time you receive a large order that needs to be filled - FAST!

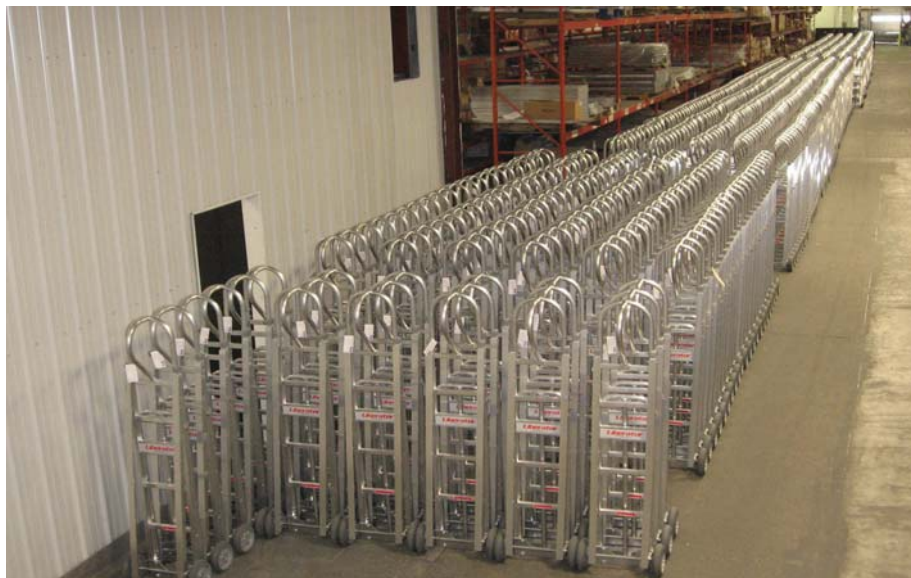

Our “hands on” approach to product development allows us to continue providing the products that meet today's challenges as well as tomorrow's. Working with the users of our products keeps us in tune with the ever changing delivery environment.

Local distributors play a key role in maintaining communication between you and manufacturing. This keeps us up to date on current trends and lets us see “into the future” as delivery methods evolve.

On site training and demonstration facilities let everyone from manufacturing, engineering, customer service and sales experience first hand how the products work. This helps us maintain our high level of service. End users also visit our facilities and lend key information in developing new products for the real world.

Your Local Distributor:

Ask about our no-obligation 30 day demo program!
